PROFESSIONAL SUMMARY

UI/UX Designer with experience designing user-centered digital products for web and mobile applications. Skilled in **Human-Computer Interaction (HCI), problem solving, user research, wireframing, interactive prototyping, and usability testing**. Proficient in Figma, Adobe XD, and modern design tools to create intuitive and visually engaging interfaces. Experienced in building design systems, improving user flows, and collaborating with developers to deliver responsive and accessible user experiences.

SKILLS

UI/UX Design: User Research, Wireframing, High-Fidelity UI Design, Interactive Prototyping, User Flows & Journey Mapping, Information Architecture, Responsive Web Design, Usability Testing & Iteration, Design Systems & Component Libraries

Visual Design: Typography, Color Theory, Layout & Visual Hierarchy, Brand Consistency, Landing Page Design

Design Tools: Figma, Adobe XD, Sketch, Adobe Illustrator, Adobe Photoshop, InVision

EXPERIENCE

UI/UX Designer

School of Techies - Chennai

- Conducted **user research and analyzed user pain points** to improve product usability.
- Designed **wireframes, user flows, and high-fidelity UI screens** using Figma.
- Built **interactive prototypes** for web-based applications.
- Conducted **usability testing sessions** and implemented improvements based on user feedback.
- Developed **reusable components and design systems** for consistent UI across products.
- Prepared **developer-ready design handoffs** including spacing, typography, and component states.
- Collaborated closely with **frontend developers** to ensure pixel-perfect implementation.
- Ensured **responsive design across multiple screen sizes and devices**.

PROJECTS

AI Healthcare Assistant Interface

- Designed a chat-based user interface allowing non-technical users to interact with enterprise documents.
- Created structured conversation layouts to reduce cognitive load and improve readability.
- Applied information architecture principles for intuitive knowledge discovery.
- Designed UI focusing on accessibility and usability.

AI-Powered Phishing Detection – Landing Page

- Designed a conversion-focused landing page for an AI security product.
- Translated complex security concepts into clear and user-friendly interface elements.
- Applied visual hierarchy, typography, and CTA optimization.
- Built responsive layouts aligned with brand guidelines and design consistency.

Car Rental Comparison app

- Designed a mobile-first booking experience for comparing rental vehicles.
- Created end-to-end user flows from search to booking confirmation.
- Conducted usability testing and iterative improvements.
- Delivered interactive prototypes and design documentation.

EDUCATION

Master of Computer Science in (Information Security), VIT University (GPA: 7.0)

Jul '22 — Aug '24
Vellore

Bachelors in Electrical and Electronics Engineering, Ganadipathy Tulsi's Jain Engineering College (GPA: 7.8)

Aug '18 — Jun '22
Vellore

CERTIFICATIONS

UI UX Designer Certification, School of Techies
